

YOUSSEF DIAA EL DENN

FULL STACK WEB DEVELOPER

Elminay 61111, Egypt | yousefdiaaeldenn@gmail.com | [+20 1050414425](tel:+201050414425) | [LinkedIn](#)

PROFILE

Full-Stack Developer & Programming Instructor with 2+ years of experience building scalable web applications and mentoring over 50 students. Currently maintaining a **98% academic degree** at the **WE School for Applied Technology** and holding a **Pearson International Certification in Web Programming**. Specialized in **Flask and React**, with an expanding technical repertoire that includes **C++**, **Google Apps Script**, and **Digital Logic Design**. Proven track record of developing functional school management systems and sophisticated data-driven dashboards.

ACCOMPLISHMENTS

- Built and deployed full-stack web applications using **Flask, React, and JavaScript**, including an online school exam management system.
- Trained and mentored **50+ students** in web development, significantly improving engagement and practical coding skills.
- Designed and implemented **CRUD systems** and API integrations, including Google Sheets API for real-time data management.
- Improved application performance and reliability by debugging, refactoring, and adding scalable features to existing projects.

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Python & Flask), freeCodeCamp - **May 2024 - Sept 2024**

Projects & Practice
Cairo, Egypt

- Built and enhanced full-stack web applications using **Python, Flask, JavaScript, and SQLite**, focusing on clean architecture and scalability.
- Developed a **School Exam Management System**, enabling online exams, student management, and result tracking.
- Improved application reliability and performance by **fixing bugs and refactoring code**, reducing user-reported issues significantly.
- Implemented secure CRUD operations and API integrations to streamline data handling.

Programming Instructor, Dynamix Academy **Aug 2022 - Present**
Elminya, Egypt

- Trained and mentored **50+ students** in web development technologies including **HTML, CSS, JavaScript, Bootstrap, React, and Python**.
- Increased student engagement by **30%** through hands-on projects, live coding sessions, and interactive teaching methods.
- Designed and delivered structured curricula for beginners and intermediate learners, focusing on practical, job-ready skills.
- Guided students in building real-world projects such as CRUD systems and dynamic websites.

Volunteer Programming Instructor (Charity Work), **Nov 2024 - Feb 2025**
Community Initiatives
Elminya , Cairo

- Volunteered to teach **children basic computer skills, Scratch, and Python**, helping them build early problem-solving and logical thinking abilities.
- Introduced programming concepts through interactive, age-appropriate activities, increasing students' interest in technology and learning.

- Taught children and teenagers **Web Development, Scratch, Python, and C++** to students from **multiple Arab countries** through online sessions.
- Designed engaging lesson plans and practical projects tailored to different age groups and skill levels.
- Helped students build foundational programming skills and confidence in using technology independently.

EDUCATION

Bachelor of Computer Science & Technology

Sept 2026

Elminya , Egypt

- Currently studying **Computer Science and Technology** with a strong focus on programming, software development, and problem-solving.
- Building advanced knowledge in **algorithms, data structures, databases, and web technologies**.
- Actively applying academic learning through real-world projects and teaching experience.

We School for Applied Technology

Sept 2023-Jun 2025

98%, Elminya, Egypt

- Achieved an academic score of **98%**, reflecting strong technical understanding and commitment to excellence.
- Gained hands-on experience in **programming fundamentals, web development, and problem-solving**, with a strong focus on practical applications.
- Developed a solid foundation in **computer science concepts**, supporting both software development and instructional work.

TECHNICAL SKILLS

Advanced Data Handling Mentorship	Google Apps Script & Automation Curriculum Development	Algorithm Design	Project Management
-----------------------------------	--	------------------	--------------------

LANGUAGES

Arabic, English

COURSES

International Certification in Web Programming, Pearson	Oct 2025
TOT Certificate, Mahara Tech	Jun 2025
Educational Management, Dynamics Academy	Feb 2025
AI Tools Expert, National Telecommunication Institute	Aug 2025
Full-Stack Web Development, Free Code Camp	Apr 2023

PROJECTS

Rabbaninen International University (RIU) - Official Web Portal

- **Link:** riu-university.com
- **Technologies:** HTML5, CSS3, JavaScript (ES6+), **Google Apps Script (Backend)**, **Google Sheets API**, **Google Drive API**.
- **Architecture:** Developed a serverless web architecture utilizing Google Workspace as a centralized database and storage engine.
- **Key Technical Achievements:**
 - Automated Admission Engine:** Built a custom registration system that captures student data into **Google Sheets** and automatically organizes submitted documents into secure **Google Drive** directories.
 - Dynamic Content Management:** Engineered a real-time **News System** where website content is fetched and rendered directly from a spreadsheet, allowing non-technical staff to update the site easily.
 - Advanced Admin Dashboard:** Developed a comprehensive management interface with full **CRUD capabilities** (Create, Read, Update, Delete) for student records and university news.
 - Global Reach:** Successfully deployed a responsive, multi-lingual interface {Arabic/English} supporting students from 40+ countries.

Wexam - Comprehensive School Platform

- **Technologies:** Python {Flask}, JavaScript, SQLite.
- Architected a full-stack exam management system designed to streamline online testing and academic administration.
- Integrated custom features that significantly improved student engagement and fixed critical system performance issues.

News Management Dashboard

- **Technologies:** HTML, CSS, JavaScript, Google Apps Script.
- Developed a specialized administrative dashboard to manage and synchronize news content using Google Sheets as a backend.
- Implemented core CRUD {Create, Read, Update, Delete} features, focusing on data integrity through unique timestamp-based ID management.

Automated Student Progress System

- **Technologies:** Python, C++, Google API.
- Built an automated reporting engine to generate detailed performance metrics for students across multiple programming tracks (Scratch, App Inventor, Python, C++).
- Refined previous "Student Excel API" logic to create a more robust interface between web applications and Google Sheets data.

Product Management CRUD System

- **Technologies:** JavaScript, Laravel, MySQL.
- Engineered a high-performance management website focused on efficient product data handling and relational database management.

Academic Design & Branding

- **Technologies:** Figma, Graphic Design.
- Designed the official stylized gold line-art logo for Minya University, featuring Queen Nefertiti.
- Created professional tri-fold brochures and promotional posters for educational institutions like the Faculty of Computers and Information at Minia University and Learnverse Academy.
